

Job Opening

Hydrologist/Water Resources Engineer

Immediate openings:

- **Junior- to Mid-Level Hydrologist/Water Resources Engineer**
- **Senior Hydrologist/Water Resources Engineer**

Degree in Civil Engineering required, with minimum 0-5 yrs. experience. Hydrologic Systems (HSI) has openings in our fast growing San Rafael, California office overlooking San Francisco Bay. All positions will be assigned to surface and ground water projects throughout the Pacific Northwest.

Hydrologic Systems is an environmentally oriented, full service water resources engineering consulting firm. HSI specializes in the development of sustainable environmental solutions to problems of water resources management. HSI is looking for motivated self-starters with a strong background in hydrology, hydraulic modeling and water quality. Successful candidates must be proficient in computer modeling, field data collection, statistical analyses, and possess strong written and oral communication skills. Experience in project management, computer programming, sediment transport modeling, river restoration or water quality modeling a plus.

Many of our projects require the integration of traditional with innovative approaches to water resources analyses and management. The successful candidate must be willing and able to learn new techniques to develop new solutions to old problems within a multi-disciplinary team of engineers, planners, biologists and environmental specialists.

HSI provides full health, dental and retirement benefits. HSI offers a competitive salary package based on qualifications and experience.
